[Cara Cheat Stronghold Crusader](#)

The screenshot shows the game interface for Stronghold Crusader 2. The top status bar displays 'Day 1', '9,999' gold, and '8/8' buildings. The main view shows a castle with a red flag and surrounding terrain. A Cheat Engine window is open, showing a list of memory addresses and values. A text document in the foreground contains the following text:

we make some buy and
this address
Let us make our gold inf
Ok I can see that most o
[esi+214]
I think this is our gold va
Ok I'll try it one by one to see which one will
the right code for our own gold not for all th
enemies gold
Don't forget gold is float so the value we wa
must be float

The Cheat Engine window shows the following memory addresses and values:

Address	Value
11A7F744	9959
88E9FF4	9959

The Cheat Engine window also shows a list of memory addresses and values:

Address	Type	Value
88E9FF4	Float	9959
